Managed Print

TMT provides a comprehensive managed print service in conjunction with printer industry leader HP.

Printers and associated scanning devices are an essential part of the IT infrastructure within most businesses, however, they can be costly and time-consuming to manage.

MANAGED PRINT

Whilst printers may not be considered to be "critical", their lack of availability can significantly disrupt business operations and reduce employee productivity.

Our managed print service takes away the problem allowing you to focus on running and developing your business. The service provides timely printer supplies including paper, toners, cartridges, and regular service checks to ensure printers are operating efficiently and producing quality documents.

Any printer faults or maintenance issues are dealt with quickly and efficiently. In many cases, through the use of remote monitoring, faults are identified and fixed before any business disruption occurs.

The TMT managed print service allows for printing devices to be controlled so that user access and machine use are controlled, helping to ensure the security of sensitive documents while reducing the monthly cost.

Equally, by optimising your printing resources your environmental impact can also be reduced. TMT's managed print service is available on an annual or multi-year basis and for a fixed monthly cost.

BENEFITS

Printer estate management - TMT deploys technology and systems to allow us to monitor the status of individual printers and associated devices around your IT network.

Printer supplies - Our managed print service allows for the timely procurement of printer consumables and accessories including paper, toners, and cartridges.

On-site servicing and support - Any faults or printer issues will be attended to by a qualified printer engineer who will rapidly and efficiently attend the site as required.

Software updates - TMT will ensure that all software updates for the printer estate are deployed quickly and efficiently upon release to ensure optimum functionality and security.

Predictable and known monthly business costs - The managed print service is available on a fixed monthly cost for a specific printer estate - aiding budget provision and cashflow management.
